Date: 28 Aug 2025

Medical fitness certificate for minor surgery

This is to certify that I have examined Amit Joshi. He has well-controlled hypertension on amlodipine 5 mg daily. Blood pressure today 128/82 mmHg. ECG normal sinus rhythm. CBC, blood sugar and coagulation profile (PT/INR) within normal limits.

He is medically fit to undergo hair transplant surgery under local anaesthesia. Continue amlodipine on the day of surgery. Avoid adrenaline-heavy infiltration where possible and monitor blood pressure during the procedure.
